As I was about to leave the house and mail this letter I got a phone call from a man Rueben Bercovitch who works with a producer-actor Tom Laughlin. He has made "Billy Jack" and the "TRial of Billy Jack". These two picutres have been extremely successful financially. I wrote to him a couple of weeks ago and his man called me for more information. I told him what I know about you and your work. He said that they did not know much about the publishing business but would like to look at the book. I told them that you had one publisher looking at it and the other copies were secured. I don't know how you feel about letting this copy be out of your area. I wouldn't want to be responsible as a middle man. What thoughts would you have on this? I have not seen his movies but they seem to have a lot of current political shockers in them I have been told. I told hime the book was about 640 pages . If you want to write me a little more of the content, he wondered if it was a rehash of your othe books to be that long. I could not answer that. He is waiting to hear from me. If you would feel more comfortable dealing with them directly let me know and I will send his address. or however you want it.

Best regards,
